Documentation content-api

The content api gives clients the ability to query custom content prio.one created for their customers. It is available for every user and requires no jwt authentication. You can query different content types and assets by their asset id. Furthermore you can specify which content you would like to query by their id.

Currently you can query four different content types:

- faq
- blog
- symptoms
- doctors

We will now take a look at their different content types in detail and how you query them.

In general you query different content types by their name and locality. We currently allow two different localities:

- de-DE
- en-US

The set up of queries is https://romy-dev.dev/api/v/content/<CONTENT_TYPE>/<LOCALE> or when you would like on entity by id https://romy-dev.dev/api/v/content/<CONTENT_TYPE>/<ENTITY_ID>/<LOCALE>

FAQ

```
curl --request GET \
  --url https://romy-dev.dev//api/v/content/faqs/de-DE \
  --header 'Content-Type: application/json'
```

Result:

```
[
  {
    "id": "5g1Des7x7YNOa1Qx78bJQ3",
    "question_answers": [],
    "title": "Wer ist Mi?"
  },
  {
    "id": "3BdkIrleY8oaZXDBkC0rR2",
    "question_answers": [
      {
        "answer": "Wir möchten langfristig die gesundheitliche Versorgung von Frauen in ganz Europa verbessern. Im ersten Schritt beginnen
        "id": "6EMtew94CXLBHafF7UwvVm",
        "question": "Welchen Service bietet prio.one?"
      },
      ...
    ],
    "title": "Über unseren Service"
  },
  ....
]
```

Blog

```
curl --request GET \
  --url https://romy-dev.dev//api/v/content/blogs/de-DE \
  --header 'Content-Type: application/json'
```

Result:

```
[
  {
    "header_image": {
      "id": "6n41KgxfwWmmeCiSemIsK2"
    },
    "id": "74liqjScuFQjeXpBFxXc5l",
    "intro_text": "text auf deutsch",
    "tag_list": [
      "tag2",
      "jj"
    ],
    "title": "Test blog"
  }
]
```

Blog by ID

```
curl --request GET \
  --url https://romy-dev.dev/api/v/content/blogs/74liqjScuFQjeXpBFxXc5l/de-DE \
  --header 'Content-Type: application/json'
```

Result:

```
{
  "header_image": {
    "id": "6n41KgxfwWmmeCiSemIsK2"
  },
  "id": "74liqjScuFQjeXpBFxXc5l",
  "intro_text": "text auf deutsch",
  "rich_text": {
    "content": [
      {
        "content": [
          {
            "data": {},
            "marks": [],
            "nodeType": "text",
            "value": "Rich text"
          }
        ],
        "data": {},
        "nodeType": "paragraph"
      }
    ],
    "data": {},
    "nodeType": "document"
  },
  "tag_list": [
    "tag2",
    "jj"
  ],
  "title": "Test blog"
}
```

Symptoms

```
curl --request GET \
  --url http://127.0.0.1:5000/api/v/content/symptoms/de-DE \
  --header 'Content-Type: application/json'
```

Result:

```
[
  {
    "id": "2741GVCitf018G3wFfWSUG",
    "title": "Menstruale Blutungen"
  },
  {
    "id": "TLBuZlmKvJIwzavYALSxX",
    "title": "Menstruale Unterleibschmerzen"
  },
...
]
```

Symptoms by ID

```
curl --request GET \
  --url http://127.0.0.1:5000/api/v/content/symptoms/de-DE \
  --header 'Content-Type: application/json'
```

Result:

```
{
  "description": "-",
  "id": "2741GVCitf018G3wFfWSUG",
  "title": "Menstrual Bleeding"
}
```

Doctors

```
curl --request GET \
  --url https://romy-dev.dev/api/v/content/doctors/de-DE \
  --header 'Content-Type: application/json'
```

Result:

```
[
  {
    "id": "2vvJttICtxvIXiUbLsnUS1",
    "title": "Cancer Screening Results"
  },
  ...
]
```

Doctors by ID

```
curl --request GET \
  --url https://romy-dev.dev/api/v/content/doctors/2vvJttICtxvIXiUbLsnUS1/de-DE \
  --header 'Content-Type: application/json'
```

Result:

```
{
  "description": "-",
  "id": "2vvJttICtxvIXiUbLsnUS1",
```

```
    "title": "Cancer Screening Results"
}
```

Assets

If you get a reference to an asset id you can query it by our assets endpoint. You just need to pass the asset id and it will return your desired asset.

```
curl --request GET \
  --url https://romy-dev.dev/api/v/content/assets/6n41KgxfwWmmeCiSemIsK2 \
  --header 'Content-Type: application/json'
```

Results in:
